Professional Summary

Backend-focused **Software Developer** with nearly 2 years of hands-on experience designing and developing scalable, secure applications using **Java, Spring Boot, and Angular**. Proficient in **microservices architecture**, RESTful APIs, and database optimization. Strong foundation in **data structures**, object-oriented design, and performance tuning. Passionate about building robust backend systems and continuously enhancing technical expertise.

Technical Skills

Java Spring Boot Angular TypeScript Hibernate REST API Microservices PostgreSQL
MySQL OOP Data Structures Problem Solving Git Jenkins Docker Maven Postman
SonarQube Linux JUnit Integration Testing

Experience

Feb 2024 – **Associate Software Developer**, *Saarathi Finbiz Pvt. Ltd.*, Gurugram, Haryana

- Present Designed and developed **Spring Boot-based RESTful microservices** for fintech modules, improving API performance by **25%**.
- Integrated **Angular** frontend with backend services for interactive dashboards and analytics.
- Optimized SQL queries and implemented caching strategies to enhance performance and scalability.
- Automated CI/CD workflows using **Jenkins** and **Docker**, enabling faster and more reliable deployments.
- Collaborated in Agile sprints and conducted peer code reviews to ensure maintainable, production-grade code.

Projects

2025 – Present **Authentication Microservice**, *Open Source*

- Built a secure authentication service using **Spring Boot, Spring Security, and JWT**.
- Implemented **role-based access control**, token refresh, and modular design principles.
- Repository: github.com/Rahulbudhiraja25/authService

2025 **Fintech Admin Dashboard**, *Personal Project*

- Developed a full-stack **real-time admin dashboard** using **Angular** and **Spring Boot**.
- Integrated REST APIs for transaction management and customer analytics.
- Deployed with **Docker**, implementing authentication and activity monitoring modules.

Education

2021 – 2024 **Bachelor of Computer Applications**, *Chandigarh Group of Colleges, Landran*, CGPA: 8.0

Certifications

2024 **Spring Boot and Spring Framework** – JPA, REST APIs, Hibernate

2023 **Java – Beginner to Advanced** (JSwing, Socket Programming)

Achievements

- 2025 Improved API response time by 25% through optimized SQL queries and asynchronous processing.
- 2024 Developed open-source microservices demonstrating clean, modular backend architecture.
- 2023 Recognized for writing maintainable, high-performance Java code adhering to best practices.
